Sales Growth^[100m. KRW]

region	ratio
domestic	52 %
overseas	48 %

(2021, the latest)

Outside & Inside

Building scale	B1~13F 75,040m2 (807829 sqft)
Parking lot	416 spaces
IDC scale	142349 sqft (3F~6F)
Electrical energy	20,000KW

Customized IT Solution Center

- Customized IT solution centers that can flexibly respond to customer requirements
- Provides specialized solutions such as Secured N / W according to the trend of enhanced security

Space

- Total Area 75,040m2
- computer room 142349 sqft
- Floor 5.1m
- Raised floor Height 60cm

Infra

- Tier 3 High availability
- Electric power 40,000KW two lines
- UPS Electric power : 3.0KW/36sqft
- Cooling : 1.5RT/36sqft

Network

- Broadband Back-bone secure
- Securing large overseas links
- 24x365

Solution

- Security service only secured N/W
- Existing Center-Gasan Center Liver Backup System
- Disaster recovery solution and situation room

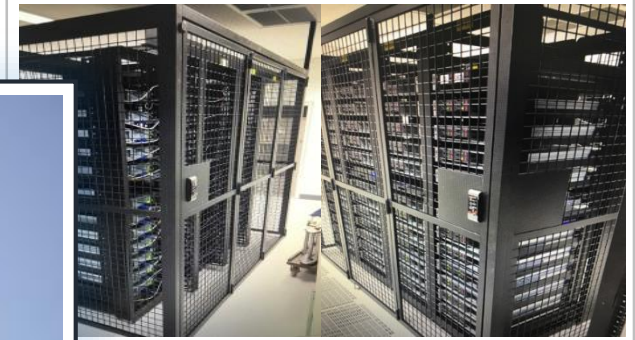

IDC Environment – ISO 27001

ISO / IEC 27001 is the international standard for the information security management system established by the International Organization for Standardization and the International Electrotechnical Commission and the most prestigious international certification in the field of information security. It is related to information security policy, physical security, and information access control. Certification is required after passing rigorous screening and verification by international judges in 11 areas and 133 items.

AI Logistics

1. High performance, high efficiency network infrastructure

- Implement proven virtualization technologies, meet standard data center requirements
- Solve the compatibility problem with equipment, apply technology suitable for the 4th industrial revolution

2. Implement infrastructure to provide nondisruptive service

- Systematic planning to ensure continuity of work
- Service continuity through redundant configuration
- Expand your customer base, and seamlessly deploy new IT services

3. Infrastructure Monitoring System

- Network, power usage, harmful traffic monitor
- Supporting monitoring task for physical equipment import and export

4. Disaster Recovery

- Isolation and independent fault handling for faults
- 24 * 7 * 365 supported
- Create and operate multiple logical devices on one physical device

5. Security Zone, DDoS Bypass Proxy Deployment

Partner

Our expertise at your service.
The doors of EhostIDC are always open and look forward to growing with you.
